

WHITE PAPER COINMARKETSOLUTION

New crypto investment solutions What does this mean for investors?

White Paper are declarative and should not be considered legal, financial, tax or other advice.

The name CoinMarketSolution, depending on the context in this document, can mean either QYT OÜ, or the CoinMarketSolution team, or coinmarketsolution.com tokenized assets exchange.

[Detailed information on investor risks and liability of the coinmarketsolution.com tokenized assets exchange is provided in chapter 9.](#)

Introduction

Coin Market Solution is a fairly young cryptocurrency platform registered in Estonia. In addition to cryptocurrency pairs, we offer our traders to trade tokenized assets. We have attracted about 3,000 regular traders who use platforms to profit from the sale and purchase of assets for a relatively short period of work.

Cryptocurrency exchange is a trading platform that allows traders to buy, sell, exchange and store their cryptocurrency assets. The mechanics of any cryptocurrency exchange are no different from the usual offline exchanges. The value of the currency here is determined by the market, which forms supply and demand curves for each token and coin. The cryptocurrency exchange acts as an intermediary for the transaction between the buyer and the seller.

Exchanges often advertise false liquidity in the hope of attracting traders and investors to their platform. At CoinMarketSolution, we believe that such financial misinformation poses a big risk for frequent traders, investors and spoils the perception of the cryptocurrency world supported by the media. We are convinced that cryptocurrency is born from a philosophy that embodies trust, openness, transparency... Most centralized exchange platforms often violate this philosophy.

In addition, many exchanges are becoming victims of serious security breaches, primarily due to a lack of efforts to protect traders' funds and outdated architectures that are not able to satisfy a growing market. The famous crypto expert Andreas Antonopoulos claims that the only vulnerability of decentralized currencies can only be connected with the centralized aspect, or simply with human greed. Despite this, we

WHITE PAPER COINMARKETSOLUTION

believe that not everything centralized has design flaws. We are also confident that hybrid mechanisms are the only way. No matter how decentralized a particular technology is, it should always be connected to centralized structures.

CoinMarketSolution Tokenized Assets Exchange is a true financial freedom and a safe environment for investing, trading or storing digital assets.

1. Tokenized assets and exchanges

CoinMarketSolution is the world’s first legal crypto-exchange of tokenized assets, allowing you to invest crypto and fiat in tokens representing exchange-traded assets. You can trade in cryptocurrency and earn in cryptocurrency.

Securities have long ceased to be securities. Stocks, futures contracts, contracts for difference, options and bonds – all financial assets are bought and sold on exchanges electronically. Cryptocurrency technologies take the world of investing to a new level of development.

What are tokenized exchange assets?

Tokenized exchange assets are tokens whose price is determined by the price of underlying assets, for example, securities (stocks, bonds) or exchange goods. From the point of view of the economic result for investors (in terms of profit and loss from price changes), they are similar to stocks, bonds, futures and other financial instruments.

As a pioneer and flagship in the world of tokenized exchange assets, CoinMarketSolution plans to issue

WHITE PAPER COINMARKETSOLUTION

more than 10,000 different tokens, the value of which is linked to the market price of traditional assets.

These assets will include shares in companies such as Amazon, Apple, Volkswagen and Coca-Cola; stock indices such as Dow Jones 30, S&P 500 or Nasdaq 100; as well as commodities such as gold, silver, and Brent Crude.

Trading tokenized exchange assets is an opportunity to purchase tokens, the price of which changes with the price of the underlying asset. Tokenized exchange assets give investors access to traditional financial markets without converting crypto into fiat. Investors can trade in these markets by diversifying crypto portfolios and not exposing them to the risks inevitable in the conversion.

Tokenized exchange assets are created using blockchain. Unlike traditional information storage systems, the blockchain is transparent and open in nature - information about the price level is regularly stored and is constantly available. Blockchain allows you to compare the prices of assets offered by CoinMarketSolution with the prices of competitors. CoinMarketSolution working conditions and fees are set out in an accessible and understandable way.

The number of cryptocurrency exchanges in the world is already in the hundreds, but the practice of trading tokenized assets is only being introduced.

CoinMarketSolution tokenized assets exchange registered in Estonia is a unique platform where you can trade both cryptocurrencies and various tokenized assets - stocks, gold, oil, food, stock indices.

The main problems of most exchanges

Modern cryptocurrency exchanges cannot give freedom of choice to all their traders. The main problem of many crypto exchanges is the lack of regulated and transparent financial instruments. Many traders have to convert crypto to fiat to invest in precious metals, indices and products.

Freedom of choice is what makes us independent. How to make cryptocurrency free?

CoinMarketSolution builds a bridge between the world of fiat money and the world of cryptocurrencies. Now you can invest cryptocurrency in stocks of world companies, mutual funds, indices, commodities, precious metals and tokenize them.

You don't need to be a physical owner for this!

WHITE PAPER COINMARKETSOLUTION

The widespread use of cryptocurrencies has led to possible problems faced by both beginners and experienced traders. CoinMarketSolution experts include to these problems such facts:

- The possibility of the exchange`s bankruptcy;
- Hacker attacks;
- Fraud by exchange managers;

CoinMarketSolution professionals recommend considering the following factors when choosing a cryptocurrency exchange:

Security. This is one of the most important factors. If the exchange you have chosen has a low level of security, then the probability of theft of funds increases. All other advantages of the cryptocurrency platform immediately depreciate;

The address of the exchange must begin with https;

Two-factor authentication;

“Cold storage”, which will contain all offline deposits;

The ability to insure your funds in case of loss;

Availability of information about the owners, managers and employees of the exchange;

Availability of headquarters address;

Steadily high trading volume;

Small commission;

The large number of cryptocurrency pairs and the necessary tools for trading.

CoinMarketSolution Tokenized Assets Exchange meets all these requirements.

CoinMarketSolution is a unique platform that will allow you to trade both cryptocurrency and tokenized assets.

INVEST TRANSPARENT AND SAFE TOGETHER WITH COINMARKETSOLUTION!

Conclusion

The problems of many cryptocurrency platforms are obvious. At the same time, CoinMarketSolution differs from other exchanges by the presence of the license, the transparency of the work of managers and teams, the ability to trade without significant risks and trade not only cryptocurrency assets, but also tokenized ones.

Security, reliability, transparency - this is CoinMarketSolution!

2. CoinMarketSolution Ecosystem

CoinMarketSolution struggles with the problems common to centralized and decentralized exchanges, providing each trader with their own account and a unique address for each cryptocurrency.

CoinMarketSolution is a new generation digital asset ecosystem that supports the massive adoption of cryptocurrencies and the fortification of a tokenized economy. The functionality and features of the CoinMarketSolution ecosystem make it a platform for exchanging, trading, storing, cryptocurrencies with an impenetrable level of security and practically zero technological barriers.

Our Mission

CoinMarketSolution Mission is to maximize investor income and minimize any potential losses by applying the principles we developed in a disciplined and pragmatic process. We rely on facts, not speculation on the purchase of highly profitable, predictable companies with significant discounts on intrinsic value.

**Change your life with CoinMarketSolution!
Become successful trader with us!**

WELCOME TO THE WORLD OF INVESTMENTS!

CoinMarketSolution – is a freedom of choice that has no limits!

Company and Team

CoinMarketSolution is owned by QYT OÜ, a company incorporated in Estonia, with headquarters in Tallinn. The activities of the company are regulated and licensed by the European Union and the Financial Supervision Authority of Estonia. Currently, more than 5 thousand customers of the company have access to transactions with more than 300 instruments, including cryptocurrencies, and tokenized assets in the markets of stocks, energy, food and stock indexes.

Our company has laid a solid foundation for future strong growth. Today, CoinMarketSolution's priority strategy creates competitive conditions for business development and will continue to create advantages over other market participants, contributing to the future success of CoinMarketSolution.

WHITE PAPER COINMARKETSOLUTION

Due to our strong qualities, we retain active customers and acquire new ones.

CoinMarketSolution's focus on first-class support is a key principle in enhancing the loyalty of customers. Constant feedback and sensitive assistance allows CoinMarketSolution to win high marks for the quality of support.

CoinMarketSolution experts constantly monitor markets with growing popularity in order to open access to the most relevant opportunities. So, we offer such financial instruments as tokenized shares of companies of cannabis producers. CoinMarketSolution intends to increase the number of interesting markets for customers to trade in accordance with applicable laws and regulations.

Coin Market Solution Values:

EFFICIENCY – we instruct our clients in detail how they can reduce risks and use their capital most effectively.

RELIABILITY – when conducting business, we give the paramount role of increased security, which ensures accurate trading without undesirable costs.

REACH OF ANY GOALS – CoinMarketSolution has a team of proactive traders, investors, analysts and programmers. We, probably like you, had periods of achievement and failure. But we never betrayed faith in ourselves and could overcome obstacles on the way to the goal.

Let's move on to the aim together!

3. CoinMarketSolution Tokenized Assets Exchange

CoinMarketSolution is a professional tokenized assets exchange. We offer you to profit from the dynamics of stock prices, commodities, cryptocurrencies, indices using capital in cryptocurrencies and tokenized assets.

CoinMarketSolution's patented technology, using banking liquidity delivery procedures, allows us to offer an innovative platform for trading financial instruments based on cryptocurrencies.

To provide the platform with optimal features, functionality and risk control systems, we have established

WHITE PAPER COINMARKETSOLUTION

strong partnerships with major global banks. Thanks to this cooperation, we can offer our customers the highest possible quality of execution of orders.

We continue to optimize the algorithms for converting incoming orders to systematically improve the productivity of sales transactions, even in conditions of increased volatility.

CoinMarketSolution Overview

Our platform has quite wide capabilities and has a number of tools that will be useful for beginners and experienced traders. On the main page there are 10 tabs is carried out for manual work on the site. Also for convenience, there is a chart on the main page that illustrates in detail the dynamics of prices for various assets. You can buy or sell assets using the “sell” and “buy” buttons.

An important feature of the CoinMarketSolution platform is the widest choice of markets. Major cryptocurrency exchanges offer to trade exclusively currency instruments based on Bitcoin, Ethereum and other assets. On the CoinMarketSolution platform, you can trade from one wallet that is nominated in cryptocurrency – BTC or USDT. Traders can conduct financial transactions based on stocks that are listed on exchanges in North America, continental Europe, England. Trading can be carried out not only with cryptocurrency, tokenized stocks and stock indices, but also with tokenized commodities.

CoinMarketSolution combines access to various markets using Blockchain technology. You can quickly benefit from any trends, no matter what markets they may be in.

An account on the CoinMarketSolution platform can be created either in BTC (Bitcoin) or in USDT (Tether). USDT is a stable coin that equates to the dollar. This means that the quotes of the tokenized AAPL shares (Apple Inc. shares) denominated in USDT are almost completely consistent with the prices of the AAPL shares on the Nasdaq exchange. It is very convenient for understanding.

Tokenized Assets

An important advantage of a security token is its transparency, as well as the fact that transactions are carried out at a high speed. In addition, low commissions and fees for various administrative needs are established.

Risk free deal

This is an absolutely innovative feature. Its essence lies in the ability to write off a negative financial result

WHITE PAPER COINMARKETSOLUTION

from the account. The CoinMarketSolution bonus program allows you to get an advantage and, depending on the type of open account, have two or even more risk-free transactions per week. It is indispensable for novice traders and helps to reduce risks, while increasing productivity.

Risk-free transactions can be very profitably used when trading on the news. This is due to the fact that the news is quite regular and involves serious price fluctuations. As a strategy for using a risk-free transaction, you can take the opportunity to open a position on the eve of news releases. This will be an absolutely win option for two reasons:

- even if the price goes against expectations, you will not lose anything;
- if the outcome is successful, then significantly increase your cash investment.

Our advantages

Availability of the European license.

High safety standards. The platform is equipped with an SSL certificate, and customer funds are under strict protection.

Our company operates completely transparent. You can get acquainted with the team, registration address and other information.

High level of technical support. We employ only professionals who can answer all questions and help with solving the problem.

A staff of qualified analysts who monitor the state of the markets and formulate recommendations on the most promising deals for exchange customers.

Intuitive interface for traders of any level.

Optimal leverage, which varies from 1: 2 depending on the instrument.

Ability to bid without cash loss.

All of the above bonuses make our platform a worthy competitor to large cryptocurrency sites. CoinMarketSolution meets all safety standards, and its wide functionality allows both beginners and experienced traders to work on the platform.

3.2. Anti-money laundering (AML)

Our AML policy spreads on:

1. Verification Procedures.
2. Compliance.

3. Transaction monitoring.
4. Regular risk assessments.

CoinMarketSolution reserves the right to collect or request relevant information to identify the user. All user data is protected in an encrypted form of data storage.

All transactions on the CoinMarketSolution platform are monitored to assess risks and determine suspicious activity using a data analysis tool.

3.3. Commissions

The provision of company services is accompanied by a number of commissions. We include to them:

3.3.1 Spread

Spread is the difference between the Bid price (sale price) and Ask price (purchase price) of tokenized assets. It will be automatically debited when a transaction is opened. For different instruments, the spread varies in value, and the type can be fixed or variable. There are several factors that affect the size of the spread. The most important is the liquidity of the instrument. Popular instruments trade with lower spreads (BID / ASK difference), and rare instruments with higher spreads. The second factor is market volatility.

3.3.2 Night swap

Swap is the percentage credited to the trader's account for positions held at night. Swap fees are only charged if trading is carried out during the night and depends on the official interest rate of the base currency.

3.3.3 Conversion fee

The company charges a conversion fee if the account currency is different from the currency of the instrument being traded. The conversion fee is applied by the Company to the conversion rate used and affects any conversions.

3.3.4 Inaction fee

If the client account is inactive for three months (90 days) or more, the Company charges a fee for servicing, administering and managing these accounts from each inactive client account.

4. CoinMarketSolution changes the world of crypto investments

New finance is a new economy

Financial markets, unlike the Soviet command economy, are characterized by decentralized economic

WHITE PAPER COINMARKETSOLUTION

decision-making. The higher the stock price of a company, the more society appreciates what it does. Raising stock prices for companies means cheaper capital in the financial markets, more research and product development, and increased employment. This is an opportunity to offer consumers the best result. Decentralized economic decision making has made an open and free economy successful in the last century.

The advent of blockchain and smart contracts has created the potential for an even more stable and secure asset exchange, free from the limitations of traditional financial markets. But crypto investors still could not use their tokens to gain access to traditional financial markets. We have changed this situation.

CoinMarketSolution has built a bridge between traditional assets and the world of cryptocurrencies. CoinMarketSolution opens up global financial markets for every investor and provides the opportunity to create diversified investment portfolios.

Disadvantages of the Existing Financial System

Until now, crypto investors have not been able to trade in the global financial markets, using their assets as collateral. Cryptocurrencies are disconnected from traditional financial markets, and need converting them into fiat for trading classical financial instruments increases risks and time costs. Investors do not want to go from crypto to fiat, but they want to have a great opportunity to diversify investments and risks.

PROBLEM

Markets for crypto investors are limited. They cannot invest in stocks, indices, raw materials, precious metals. Crypto assets have potential, but go into speculation or ICO. These are high risks.

DECISSION FROM COINMARKETSOLUTION

- A BRIDGE BETWEEN THE CRYPTO-WORLD AND TRADITIONAL FINANCE.
-
- INVESTMENTS AND TRADE OF TRADITIONAL FINANCIAL INSTRUMENTS FOR CRYPTOCURRENCY

COINMARKETSOLUTION CAPABILITIES

- Trading with leverage from 1:10 to 1:100
- Excellent scaling of the match mechanism

WHITE PAPER COINMARKETSOLUTION

- The speed of 50 million operations per second
- Access to 10,000+ global financial assets in two years

LEGALITY

- COINMARKETSOLUTION - it is legal and transparent ...
- COINMARKETSOLUTION is regulated in Estonia;
- Estonia has adopted international practices AML and KYC;
- There is no tax on crypto operations in Estonia.

OUR STRATEGY

The CoinMarketSolution project earns commissions for conducting transactions and services. Investors get unique access to global markets at a competitive price.

Business model

Like many exchanges, we receive income from commissions for transactions and services. We are absolutely transparent regarding fees. CoinMarketSolution strives to make the crypto platform attractive for everyone - from experienced investors who have significant crypto portfolios and are looking for an all-in-one investment solution, to people who have heard about cryptocurrencies but are struggling with barriers to entry or do not want to move away from traditional assets.

CoinMarketSolution Rewards

We charge a trade fee without leasing in the amount of 20 USDT - 0.2% of the volume of the purchase and sale transaction or change of tokens.

The leverage trade fee depends on the type of tokenized assets:

- Stocks - 0.05%
- Indices and commodities - 0,0125%
- Cryptocurrencies - 0.1%

Bonds are not available for trading with leverage. Commission for trading bonds without leverage on the delivery part for tokens representing these bonds is 0.05%. We charge a storage fee of tokenized exchange assets in the amount of 50 USDT (equivalent to 0.5%) per year - proportionally once a quarter. A storage

fee is not charged when trading with leverage and when withdrawing tokenized exchange assets with CoinMarketSolution.

Safety

Adhering to the requirements of legislation and EFSA of Estonia, the CoinMarketSolution team creates a safe and reliable platform for investors, which meets the best international standards.

Compliance

Security is the most important criterion for investors choosing a trading platform. CoinMarketSolution is a global business, a team with many years of experience in creating transparent, reliable and secure trading systems. The protection of credentials / records (accounts) is ensured by the use of two-factor authentication both at the entrance to the system and when depositing / withdrawing funds, trading, as well as using API keys to automate interaction with the crypto platform.

The platform implements the requirement to protect user accounts, keeps track of operational incidents and IP addresses. Protection of payment deposit and withdrawal processes is implemented taking into account the security requirements of international payment systems (PCI DSS). At the same time, reliable payment protection is combined with an intuitive user interface.

We adhere to strict and clear industry standards as well as stringent AML / CTF requirements. CoinMarketSolution received EFSA resident status with the right to conduct the activities of a crypto platform operator and other types of activities related to the use of tokens.

Technologies

BEST TECHNOLOGIES AND UNIQUE OPPORTUNITIES FOR CREATING SUCCESSFUL GLOBAL FINANCIAL SYSTEMS

The CoinMarketSolution crypto platform is based on best-in-class technologies created by a team with extensive experience in creating successful global trading floors.

Many new generation cryptocurrencies have infrastructure problems. Most of them were developed in haste by teams with sufficient technological experience, but with little or no experience in financial services. The CoinMarketSolution crypto platform differs from its competitors in unique advanced technologies

WHITE PAPER COINMARKETSOLUTION

that underlie almost every element of it: from smart contracts and blockchain to the direct management of trading servers.

The flexible scalability of our advanced cloud technology allows you to cope with the growth in the number of users and the volume of trade with minimal upfront investment.

Easy to use and intuitive platform gives easy access to a wide range of markets, advanced charts, market analysis, reporting and payment systems. Unlike competing platforms, our system withstands the scaling of trade volumes and the number of transactions, ensuring minimization of risks and high speed of operations.

Reliability and speed of operations, as well as getting the price they see to trade in markets with sufficient liquidity, are critically important for traders. For many platforms, this is problematic due to the large amount of artificial liquidity that is not always available for a transaction. We are solving this problem.

The CoinMarketSolution development team has extensive experience in creating traditional trading floors and exchange order execution mechanisms.

5. CoinMarketSolution Tools

Indices

Trading indices depend on stock market indicators.

Regular trading of world famous financial indices with CoinMarketSolution! Our specially developed trading technologies will allow you to easily carry out successful and huge transactions.

Indices can track the performance of several stocks and even large groups. They will allow you to speculate, given the performance of the stock market, as opposed to trading in individual stocks.

Stock indices are considered less risky than, for example, trading in individual stocks. Your risk is distributed across the stock market, not one stock. This eliminates most of the factors that affect individual stocks.

CoinMarketSolution offers you indexes that are available worldwide. This allows each trader to participate in world trade.

Only with CoinMarketSolution you can easily speculate in the global stock market. Trade stock indices

from around the world to succeed in the stock market, taking advantage of CoinMarketSolution.

Commodities

Trade commodities with ease! CoinMarketSolution has conquered the product market thanks to our experience in financial analysis and the highest standards of accuracy!

Goods are physical assets that are in high demand.

Commodities are commonly referred to commodities such as sugar, coffee beans, cotton, and others. In addition, agricultural products (industrial crops, food crops, and even livestock) fall into the commodity category.

Trading cryptocurrency using debt capital as the underlying asset

This gives traders the opportunity to trade in the future market using cryptocurrencies and debt capital.

CoinMarketSolution has brought luck to many customers in the product market.

Our in-depth research of the financial market leads us to more and more customers. Trading goods on the exchange can be difficult due to different sizes, a wide selection of exchanges carrying different goods, and expiration dates. The advantage of cryptocurrency transactions with leverage is that they reduce the complexity of trading. Trading cryptocurrency using borrowed funds may offer lower trading costs.

Precious metals

Start trading in well-known precious metals markets with CoinMarketSolution.

Precious metal is a rare, naturally occurring metal chemical element that has high economic value.

Now you can easily trade gold, platinum and other precious metals online. Start trading in the global precious metals markets with CoinMarketSolution and enjoy the benefits of trading with a regulated company.

At CoinMarketSolution, you can easily trade gold, platinum and other precious metals online using tokenized assets.

We will help you with regular market reports and live news in streaming mode, as well as with an analysis of the latest changes in the metal markets.

CoinMarketSolution offers a customizable platform with automated trading solutions to provide the best

trading experience for customers. Our exclusive trading platform provides quotes for all precious metals, join us to diversify your portfolio.

Energy resources

Make smart investments in energy companies and profit by trading energy products with CoinMarketSolution.

The most developed commodity market is non-renewable energy sources, which include fossil fuels such as coal, oil (in various mixtures and grades) and natural gas.

Energy products are solid products that include renewable and non-renewable energy sources.

The price of these products is one of the most popular economic indicators on the part of traders, economists, governments and enterprises, given the relationship between economic growth and energy consumption. Oil was the first widespread form of energy.

Learn about energy trading experience with CoinMarketSolution!

Our easy-to-use trading platform offers specialized services and energy trading security with industry-leading risk management tools. We will help you to invest wisely in energy companies in order to make a profitable bet on the price of energy carriers.

Cryptocurrencies

CoinMarketSolution is one of the most reliable cryptocurrency trading platforms. Start trading with our professional tools and team to learn more about the world of cryptocurrencies.

CoinMarketSolution is one of the most secure trading platforms.

Cryptocurrency is a digital (virtual) currency that does not have physical expression. The unit of such a currency is a "coin". At the same time, the coin is protected from fraud, as it is encrypted information that cannot be copied. Cryptocurrencies are not subordinated to central banks and supervisory services by the government. They use blockchain technology.

By trading cryptocurrency, you can speculate not only on growth, but also on its fall. Using leverage allows you to trade without the need for ownership of cryptocurrency.

WHITE PAPER COINMARKETSOLUTION

7. CoinMarketSolution – platform development

Our goal is to become the next generation digital asset exchange that can connect the world of traditional finance and the new growing digital economy. We strive to give attractive offers to our users, while maintaining the ease of use of the platform and staying on top of innovative trends.

We are also stimulating the creation of a new financial ecosystem based on the interaction of assets and blockchain technology.

The activities of CoinMarketSolution are aimed at:

- Providing a platform of exchange between fiat, cryptocurrencies and digital assets with greater intensity.
- Providing our users with an effective platform that can withstand significant loads and operate at optimal performance even during peak loads.
- Providing new and promising projects and their communities with a reliable platform
- Contributing to the development and growth of the blockchain and crypto assets industry.

Future platform developments

- Allow users to export wallet private keys.
- Advanced trading platform functionality.
- Limit orders, stop loss, extended chart.
- Mobile applications for iOS and Android devices.
- A decentralized exchange application (will allow the exchange to function properly, even if the exchange site does not work).

Future marketing efforts

Future marketing plans include, but are not limited to:

- Press coverage, campaign on social networks, interviews, AMA, meetings, trade competitions, air events, the continuation of ongoing marketing campaigns.

EU regulation

CoinMarketSolution is a provider of tokenized assets with an EU license to create and maintain virtual wallets and conduct cryptocurrency exchange transactions. Our regulation is in full compliance with the strict European Union Directives.

CoinMarketSolution is also regulated by Estonia's EFSA. The Estonian regulator is one of the organizations that, instead of prohibitions, prefers to develop digital money circulation rules and optimal conditions for the development of the cryptocurrency industry. Estonia was one of the first EU countries to legalize crypto activities. In March 2019, experts named Estonia the best country for blockchain business.

9. Disclaimer and Risks

9.1. RISK FACTORS AND DISCLAIMER

By becoming CoinMarketSolution user, you assume the following risks.

9.1.1. You are considering the possibility of making transactions with tokenized exchange assets on CoinMarketSolution, which are investment instruments with high risk.

9.1.2. This White Paper manual provides information on the risks associated with tokenized exchange assets, but it does not indicate the full extent of the risks or the relationship between your personal circumstances and risks. If in doubt, you should seek professional advice.

9.1.3. Before concluding an agreement and starting a trading relationship, it is important to understand the risks associated with using our platform and tokenized exchange assets. If you decide to enter into trade relations with us, it is important that you know about the possible risks. Sufficient financial resources are needed to bear such risks. You must also carefully monitor your transactions and risks, related to them.

9.2. BIG LOSSES

9.2.1. The nature of investment using leverage means that both potential profit and loss increase. You can incur significant losses if the price moves in the opposite direction relative to your expectations. To avoid big losses, use the risk management tools offered by CoinMarketSolution. Please note that you cannot lose more than the balance in your account.

9.3. LEVERAGE OPERATIONS WITH TOKENIZED EXCHANGE ASSETS ARE NOT SUITABLE FOR LONG-TERM INVESTING

WHITE PAPER COINMARKETSOLUTION

9.3.1. Leverage operations with tokenized exchange assets are not suitable for long-term investment. If you hold a tokenized exchange asset for a long time, the costs associated with this may increase. In this case, it may be more advantageous to purchase instead of it a basic asset or a tokenized exchange asset without leverage, which can be sent to Identifier of your virtual wallet.

9.4. NO RIGHT TO BASIC ASSET

9.4.1. Tokenized exchange assets do not provide any rights to underlying assets.

9.5. INVEST ONLY THOSE MONEY THAT YOU CAN ALLOW TO LOSE YOURSELF

9.5.1. You should not invest money in tokenized exchange assets that you cannot afford to lose. Investing in tokenized exchange assets carries a high degree of risk for the investor, and losses can be incurred due to fluctuations in the value of assets.

9.6. CONFORMITY

9.6.1. Any decision to create an account (account) and purchase tokenized exchange assets, as well as whether you understand the risks, is made by you.

9.6.2. We may ask you for information about your financial assets and income. To assess your risks, we will not track the compliance of the amount that you invested on the CoinMarketSolution crypto platform, or your profit or loss, the information you provided. Only you yourself must evaluate whether your financial resources are sufficient and what degree of risk you are prepared for.

9.7. POTENTIAL RISKS

9.7.1. There is a chance to lose all the funds contributed to carry out operations on CoinMarketSolution, but you cannot lose more than the balance on your account.

9.7.2. Before starting trading, your account should have enough funds to make the “initial amount” of prepayment for leverage operations. In order for the leverage operation “to remain valid”, you must make sure that the amount of money in your account exceeds the required amount of “supported” prepayment. The initial amount of prepayment will vary depending on the type of tokenized exchange assets. The amount needed for a particular transaction is indicated on the CoinMarketSolution website.

WHITE PAPER COINMARKETSOLUTION

Trading using leverage can work both for you and against you; a small price movement in your favor can lead to high profits, and a small price movement in the opposite direction can lead to significant losses. Trading tokenized exchange assets with leverage means that by making an initial prepayment, you will significantly increase the possible economic result from the corresponding operation. Leverage increases the size of your transaction, and your potential profit, as well as potential loss, will also increase.

You should carefully and actively monitor all of your active leverage operations to manage the risk of large losses.

For example, a leverage of 10% (or 1:10) means that if the price of the underlying asset changes by 1%, then the value of acquired tokenized exchange assets relative to the amount of prepayment will change by 10%. Each instrument has a fixed leverage specified in its details.

It is worth remembering that by investing all the funds, you will be less able to withstand the market volatility than when investing only part of the size of your funds.

9.7.3. Make sure that the amount on your account exceeds the size of the supported prepayment so that the leverage operation remains active. This is necessary when the price moves against you and you need to make additional funds as soon as possible to keep the leverage operation active. Otherwise, we have the right to terminate, in whole or in part, your leverage operations. The risk of any losses incurred by you lies solely with you.

9.7.4. In accordance with the contract, we have the right, at our sole discretion, to submit a request for additional funds to keep the leverage operation active, which you must immediately fulfill. Otherwise, we have the right to terminate, in whole or in part, your leverage operations.

9.7.5. If you have not set an absolute limit for your losses using the Guaranteed Stop installation, adverse market movements can lead to the loss of the entire balance of your account.

A Guaranteed Stop is not offered for every instrument, but there are other risk management mechanisms, for example, by setting the conditions for applications “Close when a loss is received” or “Close when a profit is received” in your account, which will help reduce losses. Please note that the effectiveness of the use of the “Close upon receipt of loss” and “Close upon receipt of profit” mechanisms is not guaranteed if the quote changes very dramatically.

9.8. NOT SUITABLE AS A SOURCE OF STABLE INCOME

9.8.1. As a rule, tokenized exchange assets are not suitable for an investor looking for a stable income from their investments. This is because the return on such investments can fluctuate significantly in value terms in fiat units.

WHITE PAPER COINMARKETSOLUTION

9.9. MARKET VIBRATIONS

9.9.1. It is important to understand and take into account the risks associated with trading tokenized exchange assets, since fluctuations in the price of the underlying market will affect the profitability of trade and the result of investments.

9.9.2. Price slippage occurs when the market moves suddenly in any direction, and represents the difference between the expected price of the transaction and the price at which it was actually executed. In such a scenario, the price “slips” when the market “moves” from one state to another. This applies to both profitable and unfavorable changes in the price and can lead to losses (negative price slippage) or to profit (positive price slippage).

9.9.3. Trading tokenized exchange assets is only suitable for customers who fully understand the risks and have experience in investing in financial markets. If you are not sure that you fall into these categories, we recommend that you seek independent advice.

9.10. OPERATIONAL RISKS

9.10.1. The operational risks associated with using CoinMarketSolution on your computer or mobile device are inherent in each transaction with tokenized exchange assets. Violations in the operational processes of the CoinMarketSolution crypto platform, such as communications, computers, computer or mobile networks, external factors, can lead to delays in the execution and settlement of transactions. QYT OU is not responsible for any deficiencies in the CoinMarketSolution operating processes, unless they arise due to the fault of QYT OU.

10. FAQ

What is CoinMarketSolution?

Coin Market Solution is a product of QYT OÜ tokenized assets provider and it is a universal platform providing a full range of services using cryptocurrencies. Thanks to Coin Market Solution, you can place long-term investments, implement short-term highly profitable speculations, and also conduct exchange operations with crypto assets.

How is the exchange going?

1. Account registration. Just click the “open an account” button on our Coin Market Solution site and fill

 Name of entrepreneur QYT OÜ

out the standard form, indicating your name, e-mail, phone. It's free, an account opens instantly.

2. Account verification. In order to comply with the security of customer accounts and within the framework of the current EU legislation, it is necessary to provide identity documents.

3. Exchange. Immediately after confirming your identity, you can conduct an exchange. Using your bank card, make a deposit in fiat money - and get Bitcoin or Tether into your account.

Having a BTC or USDT in your account, you can use them as a means of accumulation (keep them for a long time), buy and sell any available tokenized assets (oil, stocks and others), exchange them for other cryptocurrencies.

What time is it?

24/7. The system works "on the machine".

How fast will I receive a BTC / USDT account?

It depends on whether you are doing the first exchange or repeated. If you just verified a new account, then the first exchange creates a new wallet, it must be approved in the blockchain system. Then the wallet will be available for transactions. As a rule, in CoinMarketSolution this process takes up to 30 minutes. If the exchange is repeated, the process will happen faster than you drink espresso.

Is it reliable?

Yes. We are accountable to European financial regulatory authorities and value the reputation of the company and brand.

What are the limitations?

The minimum amount to exchange is the equivalent of 500 USDT.

What is the commission?

To replenish accounts in CoinMarketSolution no commission is charged. However, your bank may charge a fee.

At what rate will the exchange take place?
